

PROUD SPONSOR OF THE BUFFALO BILLS

Niagara Metals / Triple M Metal Diesel Truck & Equipment Mechanic

It all started in the 1890s, when Abraham Levin (1868 – 1928) founded the Louis Levin Company, a scrap recycling business in the Buffalo area. His son, Louis (1899 – 1989), transformed the company from a horse and wagon operation to a modern scrap processing facility supplying the many mills and foundries in Western New York. Lou's reputation of being tough but honest earned him respect throughout the industry and the community, and created the mold for success that still exists today. Amazingly he worked till the age of 91.

Today, Niagara Metals / Triple M Metal is a full-service scrap metal and trans loading facility headquartered in Niagara Falls, NY. We are headquartered on a 55-acre, 100% concrete site that was formerly home to the Carbide Graphite plant. Our facility is complete with rail siding for 20 cars, two truck scales, a dedicated indoor car processing building, a new non-ferrous building, and the most efficient material handling equipment available today.

Located in Niagara Falls NY, is wanting to add a skilled Diesel Truck & Equipment Mechanic to our dynamic team!
