

HDM Hydraulics LLC

Company History & Background

HDM Hydraulics is an ISO certified custom manufacturer of welded body hydraulic rod and telescopic cylinders, servicing the mobile industry. We are located in Tonawanda, New York and ship our product anywhere in the USA & Canada. Our full service engineering allows us to manufacture to customer designs or we can create a design that fully meets application requirements.

HDM was founded in 1979 and was acquired by Ligon Industries, LLC in October, 2003. Ligon is a private holding company with a mission to be the supplier of choice in the OEM hydraulic cylinder markets.

HDM employees are the heart and soul of the company. Our future depends on the skill and dedication of every person employed. Our company's continued success is the direct result of each person's initiative, professional development and commitment to the HDM team. Through internal contributions we achieve our corporate vision:

A quality team producing quality cylinders we would be proud to buy”

HDM currently has approximately 150 employees and has seen growth over the last several years in the departments of CNC Lathe and Mill, Welders, Assemblers/Testers and Material Handlers. We are always looking for quality candidates to apply for employment opportunities here and our opportunities are listed on multiple sources – NYS Dept of Labor, Indeed and WNYJobs.
